Orders must be placed by April 19th

WHY A RAIN BARREL?

Have you ever wondered
how much water runs off
your roof?

During a typical moderate
storm, over 700 gallons of
water will run off the
average 1200 sq.ft roof.

That same roof will shed
over 4,000 gallons of water
from April to August.

**YOUR PLANTS WILL
LOVE IT!**

Rain water has no added
chemicals. Collect the
soft rain water your plants
crave.

Ready for your gardening
needs, this rain barrel re-
plenishes it's water supply
every time it rains.
